

Question:

There seem to be quite a few mobile safety cameras up around the Ackworth area recently and I was wondering if they were speed cameras or a DVSA purpose camera or weight restriction cameras?

Answer:

As a Parish Council, we haven't officially been made aware of the purpose of the mobile units however from general knowledge I believe the purpose of these vehicles are to promote safety and improve general driving behaviours when present.

I have included the link from the company for you to read more on if that is of interest
